DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 and 24-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanguay et al. (US 5,946,488).

As per claims 1-4, 6-8, 15-22, and 26, Tanguay teaches a system for processing command line input, the system comprising: a command line interface (user input, 230, display, 240, code viewer, 220) comprising a set of executable commands; and a command line processor for, at least; parsing the command line input; identifying one or more macros within the input, expanding the one or more macros into at least one executable command of the command line interface, and executing the commands independent of compilation.

(Abstract, cols.2-12)

Tanguay teaches the use computer programmer system wherein the user is able to selectively examine specific source code including the selective expansion of macro that appears in the source code. The user is able to expand the macro into other macro calls and also has the ability to expand and un-expand selected macro calls. The computer programmer system allows the

Art Unit: 2182

expansion of the macro in a preprocessed system, in other words, the user is allowed to expand and un-expand selected macro calls before compilation of the source code.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tanguay et al. (US 5,946,488).

As per claims 23, Tanguay does not expressly teach the use of a DOS prompt, however Tanguay does teach the use of a user input, 230 for selected input by the user. Nonetheless, the use of the DOS prompt is well known in the art, thereby making use of this interface obvious.
